

FAST Assessment Report

CLASS : CAM 2-6

DATE- 17-09-18 to 28-09-18

Reading is crucial for academic success. National and international research shows that a child must be an independent reader with fluency and comprehension by the end of grade 3. In order to build the skill and will to read in children, it is important for us to be aware of what children's reading levels are and identify areas of growth.

Keeping this objective in mind, Maharaja Agarsain Public School has signed up for FAST Reading assessment, FAST is an indigenous and scientifically robust online, diagnostic assessment tool developed for children in grades 2 to 6. The aim of FAST is to make India PISA ready by 2021. In this assessment, students' meaning making (comprehension) and word use fluency(vocabulary) at various degrees of complexity were tested through online time bound test in the school premises.

The results will help the teachers prepare diagnostic plans for students according to their level which will help in improving reading and comprehension skills in students.

Participants- Classes 2 to 6 were part of this assessment

Learning Outcomes

- The assessment helped the teacher and the students to analyze their reading level and work in that area.
- It gave the students a first-hand experience of doing an online time bound test which will help the students in future Olympiads.
