

World Hemophilia Day

Date: 17.04.2023

“Sometimes, Real Superheroes live in the hearts of small children fighting big battles!”

To raise awareness for Hemophilia and other bleeding disorders, #WorldHemophiliaDay is observed on 17th April. On this occasion, students of class VIII showed a wonderful and informative Role Play spreading awareness among children about this disease. We all have to fight against it together to stay healthy and safe.
