

SMART GOALS

At MAPS, we encourage students and staff to set SMART goals for themselves.

STUDENTS: We foster the belief that academic excellence is a means to better ourselves rather than competing with peers. Our goal, thus, is to reward students based on improvement shown individually in comparison to their previous scores and doing away with the traditional approach of norm referenced awarding system. To acclaim the achievement of these goals, the school has a system of felicitation wherein students who enhance their score by a set percentage are lauded.

The teachers track their progress in relation to the goal, review and improvise strategies and plans to attain fulfilment.

STAFF: To nurture a passion for teaching and learning, our committed educators set their individual goals with a specific end-date. The goals may be as per the needs of the students or professional or as per their role in the school system e.g. improving academic results by a set percentage, better classroom management or setting deadlines for assigned tasks. Regular teachers' training workshops and micro-teaching sessions not only equip the teachers with effective methods of teaching but also help them to identify drawbacks and set goals accordingly.

In accordance with our Mission Statement for the period 2017-2022, the school has also set a SMART goal for itself that by 2022 each and every student of our school will be aware of the 17 SDG goals and will have collaborated in a project/campaign/programme/activity towards the achievement of an SDG goal(s).

Our Values

- Commitment - to provide quality education with state of the art infrastructure and facilities
- Excellence - in all domains of education be it curricular or co-curricular
- Inclusion-making efforts for a more inclusive society by fostering a mindset of accepting and appreciating differences
- Respect -for the child as an individual
- Nurturing - a respect for Mother Earth; a safe and caring environment where everyone is valued and appreciated.
- Developing - a desire in the young to give back to society and building a strong moral fibre.
- Celebrating - Internationalism by reflecting on our past and looking towards the future by promoting an intercultural understanding of the world

Fostering critical thinking, problem solving, collaborative and reflective thinking skills.
