EVENT – Dental & Oral Hygiene Workshop

DATE- 18.05.2022

**OBJECTIVES**-1) To promote oral hygiene and healthy eating

2) To demonstrate a good tooth-brushing technique

3) To list the ways in which they can maintain a healthy mouth

**A healthy smile is a beautiful smile!**

Your smile is your loveliest asset and it is your teeth that makes your smile look good. Therefore, oral and dental care becomes utmost important, to have a beautiful smile on your face. To spread awareness about the importance of dental care and hygiene among the students of Cambridge Wing, a workshop demonstrating various techniques and experiments, was conducted by Dr. Srishti Punjani and her team.

Her session included some insightful facts, fun activities, anecdotes, experimentation and most importantly, the correct technique of brushing the teeth.

Towards the end of the session, Dr. Srishti provided free consultation to our students regarding the problems they were facing related to their oral and dental health, such as bleeding during brushing, nail biting, bad breath, discoloration, pain in teeth, etc.

It was indeed a very informative session and our students savored every bit of it!

Live Experimentations

Active Student Demonstrations

Happy Faces after such an informative session!
