

WEEK ACTIVITY

Class – XII

24 May 2022

MATHS WEEK ACTIVITY

Have you ever stopped to look around and notice all the amazing shapes and patterns we see in the world around us! Math form the building blocks of the natural world and can be seen in stunning ways. With this fervor in mind MATHS WEEK ACTIVITY for class XII was conducted on May 24,2022,wherein the students presented mathematics in nature, architecture, machinery etc. Students presented fractals spirals, concentric circles in tree trunk, hexagonal shapes in raft bubbles and honeycomb. Continuing with the spirit mathematical bingo was played which strengthened the concepts related to determinants, derivatives, inverse trigonometry, Matrices and their applications. Students enjoyed doing all these activities.
