

# EXCURSION (CLASS 4)

What can be the more impactful way of teaching than 'learning by exploration'. To enhance their learning, class IV students went for an excursion to Nehru Planetarium on 20 November 2019, where they experienced a real view of solar system through an animated show. They were enriched with more knowledge when they participated in the treasure hunt to find the facts about our own milky way galaxy.

They went back home with a great learning experience and enthusiasm to learn more.
