

## From a Novice to a Competent learner

6TH AUGUST ' 19

"There is no elevator to success you have to take the stairs", a quote that portrays the truth. Knowing this some students tried to teach other students how to climb "The Stairs" to success.

On 6 August'19, students of class CAM 9 and CAM 10 with the guidance of Mrs. Divya Jain, conducted their class assembly on the theme From a Novice to Competent learner. The main aim behind gathering in their school auditorium, was to help parents and students to know how to meta-cognate. This is the same as how to climb "The stairs" to success. Discussing how to be a better learner, was how they tried to achieve their goal for the day.

In order to sequence the events they designed a series of 5 steps, which were being a Responsible learner, Innovative learner, Confident learner, Engaged learner and Reflective learner. To elucidate, the presenters used different methods : Panel discussion on " Responsible Learners and their attributes", Illustration Competition for innovation, Dramatic expression on Confident learners, Informative talks to engage and TED talks to reflect to others' experiences. As for as the engagement of the audience is concerned, the class held a Rubick's Cube Competition.

Good Learners were also recognised, as position holders for Spectrum'19 were awarded. The assembly ended with Mrs. Alka Sahani's ( Vice-Principal ) and Mrs.Jharna Anand's ( Cambridge Administrator) speech.

To sum up, the kids of Cam 9 and Cam 10 tasted success climbing through the stairs of preparations and they helped others to start their journey.
