

CLEAN AIR ASIA PROGRAMME – PRIMARY

Awareness and Understanding on Environmental issues is an essential part of every pupil's learning. It helps to encourage awareness of the environment. Educate and practice is the only way to change psyche of people that “Air pollution is not a joke but Air pollution will choke”.

Along with a team of Clean Air Asia Programme, we Agarsanians have decided to become the torch bearers to create awareness on air pollution problems. MAPS students acquired a basic understanding of air pollution, its causes, consequences, trends and solutions in a workshop held on 3rd May'17 by Ms. Bani. We calculated our air scores which was the eye opener for everyone and helped in taking decision to lower it.

Special Assembly was organized on 5th May'17 by Ms Megha and Ms Rashmi, where students presented their learning and made others realize that human beings cannot live without mother earth but the planet can live without humans. The major

objective of the assembly was to sensitize the people on Air Pollution and to nurture the right attitudes towards environment in the young minds.

The assembly was a huge success with an overwhelming response from the students, teachers and other staff members.
