

ASSEMBLY MONTESSORI 1 & 2 THEME - SAVE ENVIRONMENT

'One person alone cannot save the planet's biodiversity, but each individual's effort to encourage nature's wealth must not be underestimated.'

Pollution prevention is a major global concern because of its harmful effects on people's health and the environment. Montessorians contributed for the cause in the form of class assembly on 31st January 2018, Wednesday.

To highlight the harmful effects of pollution in future, the students of Montessori 1 presented a short skit followed by the song ***'The earth is my home'*** where in they sang the song and made a promise to keep the earth healthy and beautiful. The students impressed the audience with their graceful and energetic dance performance on the song ***'Mother Earth it's a great place to be'***.

Students of Montessori 2 came forward with positive attitude, pleasing smiles and utter confidence to give a dynamic performance on ***'how we are destroying the beauty of the planet Earth'***. All the children enacted their best in different roles and characters. Their dance vivacious presentation on the song ***'Life is a breath of fresh air'*** left the audience speechless.

Each child was a star of the show and got an opportunity to showcase their talent in one way or the other.
