

REPORT ON BUDDING SCIENTISTS COMPETITION

CLASS- MONT II

DATE-18.09.21

Experimentation is the greatest science. Science is simply the word we use to describe a method of organising our curiosity. Tiny tots are naturally curious, they are usually eager to learn science concepts and do scientific experiments. To provide them a science learning centre and to give them chance to perform scientific tasks in virtual session, Budding Scientists' Competition was organised with great grandeur for Mont II students. This allowed aspiring young scientists to learn and experiment about magnetic fields, density of water, learn about acidic nature of lemon, explore air expands by using balloons. This set of experiments engaged and enriched children with an hour of fun and learning activities. The judges remarked on the active participation of all the contestants and praised their talents.

FEEDBACK OF THE JUDGE- Parent of Srishti of class Pre-primary -E did judgement of Scientist Competition of Mont. II on Saturday (18.09.21). According to her, tiny tots did a fab work as they loved science on hands. She really felt delighted to see the little learners doing their experiment so well and they all explained it in a systematic manner. They learnt in fun filled way. She thanked all teachers & parents for their cooperation & preparing tiny scientists 🧑🔬. She really enjoyed.
