

HELP BIRDS IN SUMMER

As we all know due to scarcity of clean sources of water, summers are difficult times for birds, insects, reptiles and other small mammals. To help birds and other small wildlife, the students of Maharaja Agarsain Public School, CBSEi wing decided to support "HELP BIRDS IN SUMMER CAMPAIGN". Thus, to sensitize the students about the same, a healthy COMPETITION was designed where students and their parents participated as a TEAM and created useful and beautiful BIRD FEEDERS. The competition motivated the young learners to take care of birds by giving grains and water on regular basis. For their involvement and efforts, students received appreciation from the Principal, parents and teachers and winners of the competition were awarded certificates.
