

DISASTER MANAGEMENT WORKSHOP

Calamities do happen in the world but out of those situations arise ordinary people doing extraordinary things

Taking forward the same agenda representatives of the National Disaster Response Fund were invited to our school. An assembly was conducted in the morning where the NDRF representatives began by introducing themselves and the cause they work for telling the students about the 12 regiments in the country.

They informed the students about the various disasters and ways to mitigate them. Students were shown techniques in how to cope with such uncertainties. The handpicked students from the

audience actively participated in the activities and learned by doing.

After the assembly was over, two volunteers from each class were called up and a separate session was conducted with the representatives where they gave specific instructions to the students and demonstrated the actions that must be taken in such situations.

An intriguing and learning experience for the students and for the teachers as well, the workshop proved productive and resourceful.
