

IMPORTANCE OF ENGLISH LANGUAGE

Language is the Dress of Thought—

Samuel Johnson

On 1.10.2018, a discussion was done in class 1, in which the students have to speak about the importance of English language. The main aim for conducting such activity is to develop the instinct in them to use English language regularly. English is the language which is required in every field of work. It is the official language of 53 countries across the world.

The students were called one by one to speak about the importance of English language. Some students use their prop as their medium. Students spoke so well about the language.

The children actively participated in the discussion. They learn many new things about English language. And a good peer relation was seen as they helped each other in discussing about the importance of English language.

This activity was held in order to make our children self-reliant and self-sufficient in developing English skills.

“Language Matters. It Shapes Thought”.
