

## GREEN REVOLUTION

“THE BEST SOLUTION TO ARREST POLLUTION“

The school observed the **Earth Day**, the most widely celebrated international event with great enthusiasm and creativity. **Primary Eco Club** organized various activities to create awareness amongst the students. Primary children trooped into school purposefully. The promise was to “Save their Planet”, in their own small way. To propagate and spread awareness on “Save Earth” **Class 3** students had a “**NATURE WALK**”. They dressed up as Tree, Earth etc. and spoke about their importance.

**Class-4** students’ first step was to plant a **small sapling** in the school ground and to water the plants daily. Students recited poems on “**NATURE**”. The young torchbearers took out a **rally** to enlighten everyone with tips to preserve energy and water. Students spoke slogans like “**Each one, Plant one**”. They appealed everyone to grow trees. Students also created “**HUMAN CHAIN**” depicting “Together we can bring a change”. It was indeed very heartening to see children, caring so much and being aware of their environment.

Students of **Class-5** participated in “**MAPS YOUTH ENVIRONMENTAL SUMMIT 2017**”. There was a group discussion on “Why it is important to keep Earth clean and green?” A

presentation made by students was shown to them telling about the different ways to save the environment.

Primary students apprised each and everyone with the fact that the best thing one can do for the environment is re-think the way we use the resources. They sensitize others that this precious gift should be nurtured, preserved and reserved for the coming generations....

**Remember: - "SAVE EARTH, SAVE MANKIND"**
