

EARTH DAY CELEBRATION

Nursery wing

Date: - 22.04.2018

Every day should be an earth day and children are the future who are going to spread this message in a new way. It should not only be in words but should reflect in actions. To appreciate the nature, little Agarsanians did some activities – they planted ‘Saplings’ in the school premises, made a poster on save earth and also make them aware to save marine life. They took a pledge that they will not make this earth a trash bin. Their intentions were to awaken everybody to do their bit. So let us join hands to preserve earth and make it a better living place.

EARTH DAY
