

# Earth Day

Earth Day is celebrated every year on **22<sup>nd</sup> April**. It is an annual reminder of our responsibility to be good stewards of the Earth. A tree plantation drive was organized at MAPS Nursery Wing, to mark the Day. Students brought **saplings and seeds to plant in the Lawns & ground** of the school. Teachers along with students planted the saplings and seeds in the gardens. The school gardener offered friendly help and guided students well and ensured that each sapling was carefully tended. The main aim was to sensitize the students towards **Mother Nature**. The celebration concluded with the belief that the students would respect their natural inheritance and be good caretaker of their planet.
