

## English Presentation Week

### Class-2

### ‘Prepositions’

“Without language, one cannot talk and understand people; one cannot share their hopes and aspirations, appreciate their poetry or savour their songs”  
-Nelson Mandela

In the era of globalisation, English is the only global language. It has become the key instrument to express ones thought and communicate between individuals explicitly. It develops self confidence, public speaking, better job opportunities and career development. Students of class 2 prepared a presentation on the topic ‘prepositions’ with the help of props in the form of power point presentation, charts, flash cards, games, daily life objects etc. where they showcased the meaning of prepositions, it’s example and comparison among two prepositions and their usage. The students learnt through the presentation week by performing different activities. The presentation helped the learners in enhancing their speaking, creative, emotional and critical thinking skills and peer learning.
