

TRIP TO KEPLER'S OBSERVATORY (27.07.2018)

It may be that our cosmic curiosity... is a genetically encoded force that we illuminate when we look up and wonder.
If Cosmos has piqued one's interest in the stars, then one needs to add one of the incredible observatories to his bucket list.

There are some science experiences that are so remarkable that they must be experienced at least once in a person's lifetime. To witness the centuries longest lunar eclipse learners from MAPS set on a trip to Kepler's observatory, Manesar away from the city life. They enjoyed various fun filled activities like rope adventures, horse and camel riding, Tractor ride, cosmic salsa...
