

MATH E-ART COMPETITION

PRE PRIMARY

23.08.2017

Preschool teachers can create an environment in which children are eager to explore and learn about math. Exploring concepts with shapes and blocks are just one way children learn geometry early in their education, and build shape skills. It also helps to enhance Problem Solving, Fine motor and Cognitive Skills. Keeping the same in mind Math-e-Art Competition was organized for PRE PRIMARY CLASSES. The students created a figure / scene using different shapes. The activity brought out creative ideas and talent among the children. All the teachers and students appreciated the enthusiastic participation of the students.
