

Mathematics Presentation Week

Class-2

‘Addition’

“Mathematics gives us hope that every problem has a solution”

Mathematics expresses itself everywhere in almost every facet of life- in nature all around us and in the technology in our hands. It develops computational, critical thinking and problem-solving skills. To support the same, students of class 2 were asked to prepare a presentation on the topic Addition. They presented their work in the form of power point presentation, charts, flash cards, props etc. where they showcased the concept of addition, addition of 2-digit and 3-digit number, importance of addition, properties of addition etc. The students learnt through the presentation week by performing different activities. The presentation helped the learners in enhancing their speaking, creativity, emotional and thinking skills and mathematical skills.
