

A VISIT TO ZEE STUDIO- NYS LEADERSHIP CLUB
(23.05.2018)

“Leadership is unlocking people’s potential to become better”

It is rightly said that with the birth of every child, a leader is born. The only need is to provide an enabling environment, careful nurturing and a spring board for meaningful blossoming. MAPS is a cradle for young minds to showcase their skills. To foster this some students of Primary wing and Senior wing joined NYS Leadership club “2018 (Nurturing Young seeds) under Category -1and Category-2 to become good future leaders of the nation. This platform provides multiple opportunities to students to face various challenges and emerge as a great leader. These students visited Zee Studio- Fun City, Noida on 23rd May’2018, where students learned about the various tasks which they will be doing during the whole year under this programme. They were explained

about the aim of the program to identify themselves on their leadership style.

Some environment related tasks were introduced to them which they will be completing week wise during the whole session. They visited Zee news rooms also and saw how the news reports are recorded in the studio. Students really enjoyed this real life experience.

They were also told about their upcoming interactions with experts from various NGO's for e.g Goonj, Feeding India, teri etc. Overall it was a very informative and fun filled experience for students.
