

AN ARTIST AT WORK/RANGOMETRY

Date: 20.08.2018

Every child is an artist and young kids see this world in their own way. They create an image in their mind and are ready to colour this world through their imagination. Colouring is not just another activity or a task. It is a combination of many other skills like eye-hand co-ordination, aesthetic sense, focus etc. To develop the aesthetic sense and creativity of kids two different colouring competitions were organized for both Pre-School and Pre-Primary named 'An Artist at Work' & 'Rangometry'. The main aim was to observe, develop and reinforce different skills while also providing them with an opportunity to showcase their talent of creativity. Their creative work not only surprised one and all but also gave a boost to their confidence to work independently.
