RANCHING WILDLIFE PRESENTATION

22.1.24

"Every creature's fate, in our hands lies. Protect, preserve, and let them rise."

With this thought, MAPS conducted a presentation on 'Ranching Wildlife' where the students were dressed up as endangered animal and shared their views on the critical situation faced by endangered wildlife. The aim of this presentation was to raise the awareness and importance of preserving and protecting our planet's diverse ecosystems. Students' active involvement emphasized the need to protect these vulnerable species and their habitats.
