

World Health Day

Date:-07.04.2018

PRE- SCHOOL & PRE -PRIMARY

Celebrating Health Day

The first wealth is health and it is very important to teach this to the little ones at early stage itself so that they can value it. To make the children aware of prevailing food items, whether it is good for their health or not, they did an engaging activity of healthy and junk food. And at the same time they were made realize that food should not be wasted and we must value it.
