

SCIENCE WEEK- PRIMARY WING

(07-10.2016-24.10.2016)

Science plays a very significant role in our everyday life. There is no aspect of life where science does not play any role. To celebrate this significance of science, Maharaja Agarsain Public School organized a Science Week from 7th Oct-24th Oct,2016.

The aim of the Science Week is to promote the relevance of science in our everyday life and to demonstrate their importance to the future development of society. Each day students learn and experience something new.

On 7.10.2016, Class V students explored and made simple machines that are used in our routine life. Students participated enthusiastically and enjoyed a lot. They also gave presentation on machines.

On 13.10.16 ,Class IV students collected information about birds' nests. They made them with innovative ideas and gave presentation on it.

Pottery gives children the ability to think beyond the conventional norms. Clay is easy to handle for small figures.

On 18.10.16 , grade 3 children flabbergasted us by their clay work. Young alfareros surprised everyone by making beautiful diyas and pots. These pots and Diyas were further given as a token of love to an NGO as Diwali gift.

Overall science week turned out to be an edutainment experience for all. Everyone had worked hard to make this event possible.
