

A Visit to THE ZOO

Classes:- 1 and 2

Date :- 21.11.12

In our great eagerness to provide our children an education beyond the restricted boundaries of classroom and taking care of their natural curiosity and playfulness, and to teach through real life experience the school had organized an educational trip of ZOO for the students of classes 1 and 2.

All the students were excited to experience and learn about the animals that they have heard about. Prior to zoo visit students did pre activity to assess their understanding about the topic. During the visit students were fully engaged in learning and grasping all the new information about the animals.

After the visit the students together with their teachers created a zoo by making animal masks and outlines that they had seen during their visit.

The visit resulted in a fruitful association of real experience and understanding of the students.
