

World Environment Day

*Just living is not enough, one must have sunshine, freedom, and a little flower.”
– Hans Christian Andersen.*

Bountiful nature is God's best gift to us. With an aim to generate awareness about the significance of nature, World Environment Day is celebrated on 5 June globally and the theme for 2021 is 'ecosystem restoration', a global mission to revive mother earth, to go from exploiting nature to healing it. The pandemic that the world has been dealing with has shown how disastrous the consequences of ecosystem loss can be. To sensitise and to create awareness about the importance of balanced ecosystem School Chairman, Mr Deepak Jindal along with Principal ma'am, Ms Punam Gupta and other staff members planted saplings in the school premises. Let us give our coming generations a

healthier and happier environment to have a beautiful life. Best wishes on World Environment Day.
