

DAY-6 ACTIVITY

Date:16.11.17

CLASS-1

GLITTERY WAY TO THINK TIDY

Germ.....Germ.....Germ.....

Germ Are Not For Sharing - Let's be germ free

Germ are killers and contaminators. Every time we touch another person or a surface, our germ get passed around. Some of these germ can make us really sick but when we wash our hands with soap and water majority of the germ get washed away.

An activity emphasizing the importance of clean hands was conducted by the students of class 1. In which they illustrated germ through glitters on their hands and to get rid of these germ they were educated to wash their hands with soap and water before having meals, after playing outside and using the washroom.

It was a fun-filled and time engaging way that helped our children to learn healthy hand hygiene

CLEAN HANDS SAVE LIFE
