

Day-6 Activity

Class-2

Topic- MAKE IN INDIA

Date:-4.5.18 and 14.5.18

Children in the age group of seven to ten years are in the moulding stage. Right skills imparted now can help them shape their life and future. MAPS have come up with ingredients to help children gain different life skill and management skills which will not only help themselves but also their surroundings. To raise the ecological awareness amongst the Agarsanians, an activity was conducted on 4th May where the students made paper bags. The idea behind this activity was to sensitize them to stop using plastic bags. To make them more aware, a brainstorming session was held discussing the uses of paper bag on next Day 6 i.e.14.5.18
