

“Convene for clean Aerosphere”

It was yet another proud moment for the students of Mahraja Agarsain Public School when the Mayor of London, Mr. Sadiq Khan along with his team visited the school on the 5th of Dec 2017, to conduct Sensor Activity. His stay in the school was to appreciate, applaud and participate in the Project that the students of CBSE Class 5 and MAPS Cambridge International School have been undergoing since May 2017.

The Project: Cleaner Air 4 Primary Schools International is a joint initiative by The Fia Foundation, London Sustainability Exchange and Clean Air Asia. It is running in selected Primary Schools in London, Nairobi and New Delhi, India. As the India Partner, Clean Air Asia, the 30 Air Quality Champions of MAPS have been working diligently for the global issue of Air Pollution. They have explored and learnt about Air Pollution, its sources, its effects on our health and environment. They have also learnt about Nitrogen Dioxide and Particulate Matter (PM 2.5 and PM 10)-poisonous gases that pollute our air and make it difficult to breathe.

Sir Sadiq Khan's interactive and much awaited sojourn to the school was the “Sensor activity” with the 30 AQ champions. The students presented their learning through a Presentation followed by a Media Talk regarding the Air Pollution and its solutions.

His stay in the school inspired and motivated the young talent of the school. The cross cultural meeting with the dignitaries and their congenial and warm gestures will remain in the hearts of the Agarsainians for long.
