

MIRACLE EXPERTS

22.07.21

“Scientists have become the bearers of the torch of discovery in our quest for knowledge.”

Children of all ages, specially young learners love to experiment and explore. MAPS also believe to ignite the interest of their students through hands on experiments. So, keeping the same as base line, Miracle experts competition was conducted on 22.07.21 for the students of Pre Primary where the young scientists performed simple experiments under the adult supervision and explain the same in online session. The judgement was done on the basis of their presentation, safety measures taken and confidence. The basic aim of the event was to give youngsters the chance to explore different scientific concepts through their senses and also develop other useful skills including problem-solving, research and perseverance.
