

Picture smart with waste Competition- Pre School

"Creativity, as has been said, consists largely of rearranging what we know in order to find out what we do not know" - George Keller.

Using waste material to create or decorate something is one such craft which follows this principle. To make the students aware of uses of waste material, and to give them a lesson on reducing waste to save our future, a 'Picture smart with waste' competition was organized on 7.11.19 for Pre schoolers.

Little hands and imaginative minds came together in the creative burst of energy. They used recyclable and reusable materials like old CD's, old bangles, newspapers, match box etc. This competition also helped them to develop their fine motor skills. The creations were innovative, fantabulous and beyond expectations.
