The Ramanujan Challenge (18.1.24)

On January 18th, 2024, the Ramanujan Challenge - Maths Quiz was held, and it was an exciting event! Our little Montessorians gathered together to participate in this fun and educational competition.

During the quiz, students were challenged with a variety of math problems that tested their knowledge of addition, subtraction, shapes, and numbers. They had to solve puzzles, count objects, and identify patterns. It was a great opportunity for students to showcase their problem-solving abilities and think critically.

The atmosphere was filled with excitement and enthusiasm as the participants eagerly worked on their quiz sheets.

It was a proud moment for everyone involved, and the quiz served as a reminder of the importance of math skills and the joy of learning.
