

MASTER CHEF COMPETITION MONTESSORI-2 (11.5.18)

Students of Montessori -2 enjoyed getting involved in making different recipes and gaining knowledge about the nutritional value of different food items. The competition proved a good way to develop interests for food preparation among students that eventually developed their interest in eating as well. Food preparation also fosters creativity in children. The cooking recipes without using fire certainly helped to explore different possibilities of cooking. The little chefs prepared delicious and mouth-watering food items like Bhelpuri, corn chat, sandwiches, fruit salad and others dished out healthy desserts like laddoo and pudding which added a cherry to the cuisine.

Each item used was of complete nutritional value and was hygienically prepared by the students.

The winners of the competition are:

1st position: Kuvam Gupta

2nd position: Afeeza
