

Virtual Tour- Traffic Training Park

15th -17th Sep'21
Pre School

"Safety isn't expensive, it's priceless."

On 15th and 17th September 2021, MAPS arranged a virtual trip to the traffic training park in for students of Pre school with an objective to recapitulate the concept of transport, to educate students about road safety in an interesting way and also to teach the signs and signals on the road. The traffic training park was a replica of our roads and highways. Students were engaged in an interactive session with the road safety officer Mr. Manpreet who explained various traffic rules, the importance of traffic light, zebra crossing, etc.

The use of pedestrian pathway and overhead bridge on the highways while walking was also emphasized. He even discussed the importance of wearing a helmet while riding a two wheeler and fastening the seat belt while in the car. Students were also shown a PowerPoint presentation related to the same and a virtual trip to the park was taken where different games related to safety were shown to the children.

This virtual trip was an enriching experience for all the young and enthusiastic learners enabling them to imbibe the traffic rules and road safety measures. It was an experience that would be retained in their memories for a lifetime and help in grooming them into explicit road users in future.
